MEDICAL 醫療 DEVICES 器械

Pharmaceutical Equipment & Health Product

June 2021

Shanghai Woodlands Co., Ltd is a combination of manufacturing and trading company in medical instruments. We focus on export business of our own factory. Our main products are disposable temperature probes, and compatible with all series YSI400 patient monitors and hypo- hyperthermia machines. In a time of strained hospital budgets, some basic monitoring applications are not routinely followed simply because of the cost associated with monitoring device. Guidelines for safe surgery and basic anaesthesia monitoring require that all general anaesthesia procedures must have basic patient monitoring including continual temperature monitoring. WIT medical'S disposable temperature probes help you comply with required standards with accuracy, reliability and a cost savings.

All of our probes feature specific design attributes to minimize patient harm during application and enhance the accuracy of the temperature reading, minimizing fluctuations and intermittent readings. The thermistor temperature sensors accuracy: +/-0:1° C at 37° C and +/:0:2° Cat 5° CTO 45°E. All probes are latex free and compatible with all series YSI400 patient monitors. WIT Medical' S temperature probes provide for temperature measurement at a range of sites.

The Rise of Monster Serious car lovers and house owners

HARDER THEN STEEL

Monster coating™ is a dual layered coating, comprising of inorganic silicate derivatives.

Hardness can be gauged by Mohs scale. Normal steel can only reach 4.5H, hardened steel is at the range of 7.5H and diamond reaches 10H. The basal layer crystalized into a very strong clear shell, with hardness of 8H. In that sense, only diamond can mark a scratch on it.

The upper layer is an amorphous solid, a property shared with glass. It is neither liquid nor solid, but share characteristics of both. It can flow, albeit very slowly. This property explained why it has "self-healing" nature.

Water droplets slide down easily and suck up dirt along its path

HARDNESS DOES MATTER, BUT NOT ENOUGH

When you bought a new car, it shines as mirror. But once you wash it, the finest sponge leaves scratch mark on it. It is because the clear coat simply offers no resistance to scratch.

When a car is travelling in highway, due to relativity, the flying grits will strike at the same speed of that car. Bombarded by innumerous gravels each with an incoming speed of 120km/hr, regardless of the hardness of the coating, simply none can survive.

Monster coatingTM takes a different approach. It has a softer outer layer. Any scratch due to the projectile sands will leave marks on the hardest coating or even make a dent on the car body. This void will be filled up by ingressing edge of the softer layer. The process is slow, but can be hastened with heat and manual rubbing. And due to the amorphous nature, one can reapply another coating on top without worry of lamination, a common phenomenon even in car waxing.

What one usually do is to bring the car to a car detailing workshop, where technician will polish and wax it. The radiancy regains, but at a cost of a thinner clear coat due to the abrasive nature of polishing. With time, luster tarnished.

Monster coatingTM offers a harder-than-steel coating covering the vehicle. It protects the clear coat from the exterior harsh environment, such as acid rain, ultraviolet, heat and even flying grits and sand on highway. Due to its even thickness, it recreates the mirror surface in no less lustrousness than the original paint. It can even fill up the swirl marks left from the previous inattentive car wash and restore the original finish.

Ms Lee

Building with glass wall coated with monster coating can lower the manpower used in cleaning

APPLICATION IS UNLIMITED

Monster coatingTM offers a combination of a hard crystallised shell and a soft amorphous layer. This unique feature can withstand most strenuous mechanical challenge. It protects the vulnerable material underneath it from physical scratching, ultraviolet ray, chemical oxidation, acid rain and even organic solvent.

Besides, the hydrophobic nature of the softer component offers an outstanding self-cleaning and raindrop-dispersal property. As water can hardly stick to the coating, any water droplet rested on the coat will be half spherical in shape, and becomes very agile and ready to slide. When the car is in motion, the water droplets will suck up dirt along its path and fall off from the coat. After application of Monster coatingTM, the car does not require scrubbing, detergent and waxing for a period of 18 months. All one needs to do is to have a splash of water.

Similar application can be made over windscreen, side windows, windows and glass wall in skyscraper, and glass screen in houses where manual cleaning is very difficult if not at all impossible.

Hydrophobic surface with contact angle more than 100-degree

Timepieces & Jewellery (Jewellery & Accessory)

The World's Full-Service Trade Promotion Organisation.

Asia Media Information Ltd. (AMI) from 2006 creates opportunity by promoting the global trade of goods and service, and connecting the world's small and medium sized businesses through Hong Kong business platform. With our city's natural business advantages and a global network of more than 5 point, the AMI provides a range of services that help power trade between Hong Kong, the China mainland, Asia and the world.

We help the world Buy and Sell

The AMI connects millions of international buyers and sellers quickly and efficiently through six trusted and complementary services that deliver superb value. Called the *integrated Advantage*, this powerful package links our trade shows, online marketplace and product magazines with top-flight training and seminars, timely market intelligence, and tailored business matching services.

Our Integrated Advantage can be used in different valueadding combinations; fair exhibitors receive space on our online marketplace, extending the matching period of trade fairs. Advertisers in our product magazines - the official publications of our trade fairs - receive exposure to visiting buyers and marketing space on our website.

That's just the start. Check 2009 new website www.cnwatch.net to learn how the Integrated Advantage maximises quality selling and buying options.

The AMI's Integrated Advantage

Besides helping international companies do business in the mainland and Asia, the AMI also helps Hong Kong and China companies find new markets.

We take the best of Hong Kong to the world:

We organise more than 600 Hong Kong promotional events globally, reaching nearly 100,000 business people in key markets every year. We organise product and service promotions to promising markets each year. These include our "Style Hong Kong" shows and "Hong Kong Pavilions", which introduce our products and services to global markets.

We bring business to Hong Kong every day:

We bring in more than 300,000 people every year to buy, sell and make new contacts on Hong Kong's business Platform. We also receive and provide information annually for some 600 international business missions.

We focus on attracting top mainland companies to use the Hong Kong platform to explore international opportunities and meet overseas companies through our seminars and forums.

We organise networking events, seminars and workshops to promote Hong Kong's service industries to Asia and the world, particularly our creative, financial and logistical services. To further stimulate trade, we arrange regular high-level meetings with leading business people from Hong Kong and major global economies.
